

Diagrama de perfil longitudinal de uma estrada com uma seção transversal de 12m de largura. O diagrama mostra a elevação do terreno (linha tracejada) e a elevação da estrutura da estrada (linha sólida). A estrada tem uma inclinação de 1:100 e uma largura de 12m. O perfil longitudinal mostra a elevação da estrada em metros (m) e a distância horizontal em metros (m). O perfil longitudinal também mostra a elevação do terreno em metros (m) e a distância horizontal em metros (m). O perfil longitudinal mostra a elevação da estrada em metros (m) e a distância horizontal em metros (m). O perfil longitudinal também mostra a elevação do terreno em metros (m) e a distância horizontal em metros (m).
